*Arg. Sergio González de la Mora*  
DIRECTOR

February 20, 1987.

MR. JIM B. HARDGROVE  
PRESIDENT  
SPACE CENTER ROTARY CLUB  
HOUSTON, TEXAS.

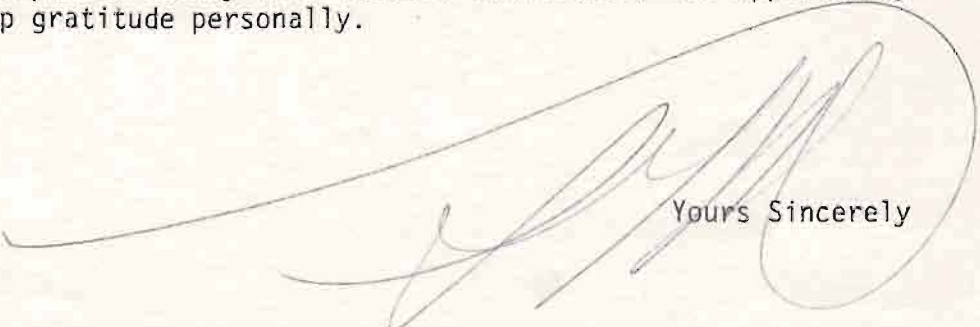

Dear Mr. Hardgrove:

The Museo Tecnológico of the Federal Electricity Commission thanks and appreciates your positive interest to our petition channeled by the Aeropuerto Rotary Club, dated on August 1st, 1986; in order to comply with the necessary requirements of the U.S. National Air and Space Administration - NASA - to be eligible to receive didactic material from the Space Programs, as well as original equipment employed in them.

The exhibition of this material will undoubtedly continue to motivate and increase interest among the Mexican youth in Science and Technology, specially in the Space Programs.

The valuable humanistic work done by the Rotary Clubs for Society as well as endorsing science and technology diffusion programs is worth of praise.

The upcoming visit to this museum by the Space Center Rotary Club and Aeropuerto Rotary Club members facilitates the opportunity to express our deep gratitude personally.

Yours Sincerely

c.c.p. Sr. Jesús de la Vega.- Presidente Club Rotario Aeropuerto.-Presente.
